

The Green Ninja Approach

Our NGSS-aligned curriculum uses a unique framework to engage students in authentic science experiences while providing teachers with all the tools they need to be successful.

1. Green Ninja uses the **environment** and **solutions to environmental problems** as the central theme for the teaching of science and engineering.

2. Green Ninja uses a **project-based approach** where student storylines guide instruction towards end-of-unit projects.

3. Green Ninja uses the right balance of **flexible instructional tools** and **hands-on materials** to effectively shift from the traditional textbook experience towards a dynamic student-centered experience.

4. Green Ninja uses **assessments embedded** throughout the curriculum to provide teachers with insights into their students' understanding and needs.
